UI Testing

Ex. Please automate 2 included scenarios using any Javascript framework you feel the most comfortable with.

Test scenarios:

1. Open 10C home page ('https://10clouds.com/')

2. Open Careers tab

3. Validate that there is exactly 1 'Senior QA Automation Engineer' role open

1. Open 10C home page ('https://10clouds.com/')

2. Open Careers tab

3. Select "QA" from "All departments" dropdown.

4. Validate that each result contains "QA Automation" or "QA Engineer" in the title

API Testing

Please use swapi API (https://swapi.dev/) to validate following scenarios:
1. GET /people/4/ is returning Darth Vader.
2. GET /people/400/ is returning 404.
Link to documentation https://swapi.dev/documentation.
Please use any Javascript library for implementation.
